

NACB Opportunities Dashboard Metrics Report

NACB Staff

August 2024

This report provides an analysis of key metrics related to opportunities displayed in the NACB (National Association of Cannabis Businesses) dashboard. The metrics presented are vital for assessing opportunity engagement, risk levels, market impact, and overall effectiveness of NACB's strategies. These insights are crucial for NACB staff to make informed decisions that enhance the performance and alignment of their initiatives with organizational goals.

1 Introduction

Effective decision-making within organizations such as the National Association of Cannabis Businesses (NACB) relies heavily on data-driven insights. This report analyzes key metrics from the NACB Opportunities Dashboard, focusing on total opportunities, risk levels, engagement, and market impact. These insights help prioritize initiatives and align strategies with organizational goals [4], [8].

2 Metrics Overview

2.1 Total Opportunities

The total opportunities metric provides an overview of all active opportunities within NACB. Monitoring this metric allows for assessing the overall workload and strategic alignment of opportunities [6]. Currently, there are 120 total opportunities, forming a substantial dataset for analysis.

2.2 Active Opportunities

Active opportunities reflect ongoing initiatives that require immediate attention and resources. NACB currently tracks 37 active opportunities, providing insights into resource allocation and operational focus [2].

2.3 Pending Opportunities

Pending opportunities are those under consideration or awaiting action. This metric is crucial for prioritizing tasks and making strategic decisions. The dash-

board shows 46 pending opportunities, indicating areas that require follow-up or additional resources [7].

2.4 Opportunities by Deadline

Tracking opportunities by their deadlines is essential for time-sensitive planning. Aligning tasks with deadlines ensures that targets are met effectively [5].

2.5 Opportunities by Risk Level

Categorizing opportunities by risk levels (low, medium, high) helps in identifying potential challenges and proactively mitigating risks. The current distribution of risk levels indicates 43.33% high-risk opportunities, requiring focused risk management strategies [1].

2.6 Opportunities by Engagement Level

Engagement levels provide insight into the involvement and interest of stakeholders. The engagement distribution includes 37.5% high, 31.67% medium, and 30.83% low levels, offering a comprehensive view of stakeholder participation [10].

2.7 Opportunities by Market Impact

Opportunities are also categorized by their potential market impact, which is crucial for understanding their influence on the industry. With 38.33% high-impact opportunities, NACB can prioritize initiatives that maximize market influence [9].

2.8 Top Rated, Liked, Viewed, and Saved Opportunities

Identifying top-rated, liked, viewed, and saved opportunities helps in understanding successful strategies and stakeholder preferences. This metric is essential for refining NACB's approach and tailoring future initiatives to align with stakeholder expectations [3].

3 Conclusion

The metrics outlined in this report provide a comprehensive understanding of NACB's opportunity landscape. Leveraging these insights will enable NACB to optimize its strategy, improve engagement, manage risks, and maximize market impact. The integration of these metrics into NACB's operational planning is essential for enhancing organizational effectiveness and aligning with strategic goals.
